## projects

### ✦ Sukito — Anime Recommendation Web App

*Figma, HTML, CSS, JavaScript, Flask, Canva*

Redesigned and developed an anime (Japanese animated content) recommendation platform from scratch with a focus on usability and aesthetics. Implemented a complete design-to-deployment workflow, handling every stage of the project independently.

### ✦ Case Study Landing Page For Sukito

*HTML, CSS, JavaScript*

Designed and developed a detailed single-page portfolio site to present the complete design journey behind Sukito. Demonstrated full SDLC skills by independently building the page from scratch. Used scroll-based interaction, animations, and clean sectioning to guide viewers through problem identification, UX decisions, and visual improvements. Explored glassmorphism for a sleek, modern aesthetic.

### ✦ Stone World Sorting Hat — Character Quiz App

*JavaFX, Gluon*

Designed and developed a personality quiz app compatible with both desktop and mobile. Inspired by Dr. Stone (a science-themed anime), the app guides users through a series of questions to determine which character best matches their personality. Handled both the UI/UX and functionality, exploring mobile-first design while ensuring cross-device usability.

### ✦ Varunet — Oil Spill Detection Interface

*Figma, HTML, CSS, JavaScript*

Designed and developed the UI for a machine learning–powered web app that detects oil spills from user-uploaded ocean images. Prioritized clarity, accessibility, and user flow. Built during Semester 4 as my first complete Figma design.

## skills

### ✦ Design

Layout Design Fundamentals
Information Architecture
Wireframing & Prototyping
Color Theory & Visual Harmony
Visual Consistency & Branding
Logo Design
Design Handoff & Implementation

### ✦ Tools

Figma, Canva, ChatGPT, Power BI

### ✦ Languages & Frameworks

HTML, CSS, JavaScript, Basic Flask

## certifications

### ✦ Complete Web & Mobile Designer

*By ZTM On Udemy  (In Progress)*

## education

### ✦ Dayananda Sagar College Of Engineering, Bangalore

*Bachelor Of Engineering In AI/ML
2023-2027*

Gained early exposure to layout design via Power BI & coursework; applied to later UI/UX projects.
